PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years of experience building microservices, REST APIs, and React applications, including enterprise work at Hewlett Packard and HPE. Strong background in Java, Spring Boot, SQL, Docker and React. Based in Puerto Rico – bilingual (English/Spanish), available for remote roles. Cross-disciplinary perspective from UI design with end-to-end full stack delivery.

SKILLS

- **Backend:** Java, Spring Boot, REST APIs, SQL (PostgreSQL, SQL Server, MySQL), Messaging Brokers (ActiveMQ), WebSocket, Microservices, ORM (Hibernate), Object-Oriented Programming, PHP
- **Frontend:** React, JavaScript, TypeScript, HTML, CSS, SASS, TailwindCSS, Astro, Next.js, Jest, Flux
- **Other:** CI/CD (Jenkins), Docker (Compose / Swarm), Linux, Git, UI (Figma / Adobe), C, CMS

WORK EXPERIENCE

Freelance / Professional Development, Full-Stack Developer (Remote) SEP 2022 - PRESENT

- Currently building a proximity-based event system API using Java, Spring Boot, PostgreSQL and PostGIS.
- Contributed to front-end design and development for ClashStats, a sports app built with React / Next.js.
- Built my personal portfolio website from concept to production using Figma, Astro, and TailwindCSS.

Hewlett Packard Enterprise, Software Engineer (Puerto Rico, Remote) JUN 2019 - AUG 2022

- Owned the development of new features, enhancements, and bug fixes for a microservices app used in partner factories worldwide built with Java, Spring Boot, REST, React, ActiveMQ, SQL Server and Docker.
- Identified and implemented solutions for critical performance, cybersecurity and synchronization issues.
- Developed new features for the React-based health monitoring service, including REST API, backend, and messaging logic for real-time updates. Improved the UX, visual consistency and design.
- Managed production operations including release deployments, maintenance, support, and incident troubleshooting sessions in coordination with internal stakeholders and cross-functional teams.
- Dockerized and improved Jenkins CI/CD pipeline which automated testing, builds, scans, and deployments.

Freelance / Professional Development, Web Developer (Remote) SEP 2016 - DEC 2019

- Delivered web design, development, and provided technical support to several non-profit organizations.
- Created a WordPress–Google Sheets integration plugin (PHP, JavaScript) to automate data handling.

Hewlett Packard, Software Engineer (Aguadilla, Puerto Rico) JUN 2015 - AUG 2016

- Migrated UI features of a factory app used to test servers before shipment from Java GWT to React.
- Researched, identified and fixed performance bottlenecks related to real-time updates and rendering.

Sysdat CREST UPRM, CAPSTONE (Mayagüez, Puerto Rico) JAN 2015 - MAY 2015

- Contributed to the design, development and deployment of a web application for NSF report generation built using a relational database (MySQL), front-end (AngularJS and Bootstrap) and back-end (PHP).

EDUCATION

Bachelor of Science (B.S.) in Computer Engineering (University of Puerto Rico) AUG 2009 - MAY 2015

- BSCpE - Magna Cum Laude, GPA: 3.84/4.00
