PROFESSIONAL SUMMARY

Software engineer with 5+ years of experience across front-end and back-end development, including REST APIs, microservices, relational databases and event-driven systems. Strong background in React, TypeScript, Java, Spring Boot, and Docker, with hands-on experience in UI design and end-to-end product development. Based in Puerto Rico, bilingual in English and Spanish, and available for hybrid and remote roles.

SKILLS

- **Frontend:** React, JavaScript, TypeScript, HTML, CSS, SASS, TailwindCSS, Astro, Next.js, Jest, Vite
- **Backend:** Java, Spring Boot, REST APIs, SQL (PostgreSQL, SQL Server, MySQL), Messaging Brokers (ActiveMQ), WebSocket, Microservices, ORM (Hibernate), Object-Oriented Programming, PHP
- **Other:** CI/CD (Jenkins), Docker (Compose / Swarm), Linux, Git, UI (Figma / Adobe), C, CMS, ASM

WORK EXPERIENCE

Independent, Software Engineer (Remote)

SEP 2022 - PRESENT

- Published Routini, a minimal React router in TypeScript – 3.2 KB, View Transitions, lazy routes, and more.
- Contributed to front-end design and development for ClashStats, a sports app built with React and Next.js.
- Designed and deployed my personal portfolio using Figma and Astro to showcase my work and projects.

Hewlett Packard Enterprise, Software Engineer (Puerto Rico, Remote)

JUN 2019 - AUG 2022

- Owned the development of new features, enhancements, and bug fixes for a microservices app used in partner factories worldwide built with Java, Spring Boot, REST, React, ActiveMQ, SQL Server and Docker.
- Identified and implemented solutions for critical performance, cybersecurity and synchronization issues.
- Developed new features for the React-based health monitoring service, including REST API, backend, and messaging logic for real-time updates. Improved the UX, visual consistency and design.
- Managed production operations including release deployments, maintenance, support, and incident troubleshooting sessions in coordination with internal stakeholders and cross-functional teams.
- Dockerized and improved Jenkins CI/CD pipeline which automated testing, builds, scans, and deployments.

Freelance, Web Developer (Remote)

SEP 2016 - DEC 2019

- Delivered web design, development, and provided technical support to several non-profit organizations.
- Created a WordPress–Google Sheets integration plugin (PHP, JavaScript) to automate data handling.

Hewlett Packard, Software Engineer (Aguadilla, Puerto Rico)

JUN 2015 - AUG 2016

- Migrated UI features of a factory app used to test servers before shipment from Java GWT to React.
- Researched, identified and fixed performance bottlenecks related to real-time updates and rendering.

Sysdat CREST UPRM, CAPSTONE (Mayagüez, Puerto Rico)

JAN 2015 - MAY 2015

- Contributed to the design, development and deployment of a web application for NSF report generation built using a relational database (MySQL), front-end (AngularJS and Bootstrap) and back-end (PHP).

EDUCATION

Bachelor of Science (B.S.) in Computer Engineering (University of Puerto Rico)

AUG 2009 - MAY 2015

- BSCpE - Magna Cum Laude, GPA: 3.84/4.00
