

KEVIN CASTILLO SANTIAGO

SOFTWARE ENGINEER

Montevideo, Uruguay
+1 (787) 675-2251
<https://kevincastillo.io>
hello@kevincastillo.io

SKILLS

- **Backend:** Java, Spring Boot, REST APIs, SQL (PostgreSQL, SQLServer, MySQL), Messaging Brokers (ActiveMQ), WebSocket, Database design, ORM (Hibernate), Object-Oriented Programming, PHP
- **Frontend:** React, JavaScript, TypeScript, HTML, CSS, SASS, TailwindCSS, Astro, Next.js, Jest, Flux
- **Other:** Git, CI/CD (Jenkins), Docker (Compose / Swarm), Microservices, UI (Figma / Adobe), Linux, C, CMS
- **Languages:** English (fluent), Spanish (native)

WORK EXPERIENCE

Freelance / Professional Development, Full-Stack Developer (Remote) **SEP 2022 - PRESENT**

- Designed and implemented reusable UI components for ClashStats, a startup's Next.js application.
- Built case study projects to strengthen expertise in modern front-end tools such as Astro and React.
- Enhanced UI/UX and visual design skills through self-directed study and practical application in Figma.
- Built cross-cultural communication skills through travel; relocated to Uruguay for personal & career growth.

Hewlett Packard Enterprise, Software Engineer (Puerto Rico, Remote) **JUN 2019 - AUG 2022**

- Led the development of new features, enhancements, and bug-fixes for a microservices app used in HPE-partner factories worldwide built using Java, Spring Boot, REST, React, ActiveMQ, SQLServer and Docker.
- Identified and implemented solutions for performance, cyber-security and synchronization issues.
- Developed new features for the React-based health monitoring service, including REST API, backend, and messaging logic for real-time updates. Improved the UX, visual consistency and design.
- Managed the production environment from release deployments, maintenance, support, to troubleshooting sessions by communicating with internal stakeholders and cross-functional teams.
- Dockerized and improved Jenkins CI/CD pipeline which automated testing, builds, scans, and deployments.
- Optimized code by refactoring common functionality to reduce code-base size and possible issues.

Freelance / Professional Development, Web Developer (Remote) **SEP 2016 - DEC 2019**

- Delivered web design, development, and provided technical support to several non-profit organizations.
- Created a WordPress–Google Sheets integration plugin (PHP, JavaScript) to automate data handling.
- Practiced English through cultural immersion while studying agricultural practices across South America, earned a Permaculture Design Certification, and volunteered in post–Hurricane Maria recovery projects.

Hewlett Packard, Software Engineer (Aguadilla, Puerto Rico) **JUN 2015 - AUG 2016**

- Migrated UI features of a factory app used to test servers before shipment from Java GWT to React.
- Redesigned many views, implemented new features and created reusable React components.
- Researched, identified and fixed performance bottlenecks related to real-time updates and rendering.

Sysdat CREST UPRM, CAPSTONE (Mayagüez, Puerto Rico) **JAN 2015 - MAY 2015**

- Designed the ER diagram, schema and deployed a normalized relational database (MySQL) to centralize data from CREST members and activities to automate the reports generation submitted to the NSF.
- Developed features in both front-end (AngularJS and Bootstrap) and back-end (PHP) such as role-based access control, data input, sign-up, login, session management, menus according to role, and more.

EDUCATION

Bachelor of Science (B.S.) in Computer Engineering (University of Puerto Rico) **AUG 2009 - MAY 2015**

- BSCpE - Magna Cum Laude, GPA: 3.84/4.00
